## YouthsVIP QUESTIONNAIRE CONSTRUCTING PROCESS

- Construction YV version 1.
- Pilot test (n=200)
- Analysis of:
  - ✓ Structure.
  - ✓ Content.
  - ✓ Contrast with others papers.
  - ✓ Reliability
- Changes → YV version 2 (definitive).

## FINAL QUESTIONNAIRE

- Introduction and identification code.
- Personal, familiar & sociodemographic items.
- Sexual rol & health Questions.
- Family Apgar .
- Identity Questionnaire. (AIQ-IIIx).
- Preferences evaluation Questionnaire.

# Design of the sample

---

## SAMPLE CALCULATION

- Prevalence estimation:

$$\alpha=0,05$$

$$n=330$$

- Contrast of hypothesis:

$$\alpha=0.05$$

$$1-\beta=0.80$$

$$n=680$$

## SAMPLING

- Randomized
- By clusters

Unit = Centres

- Stratified

 by socioeconomic level.

# Study Population

---

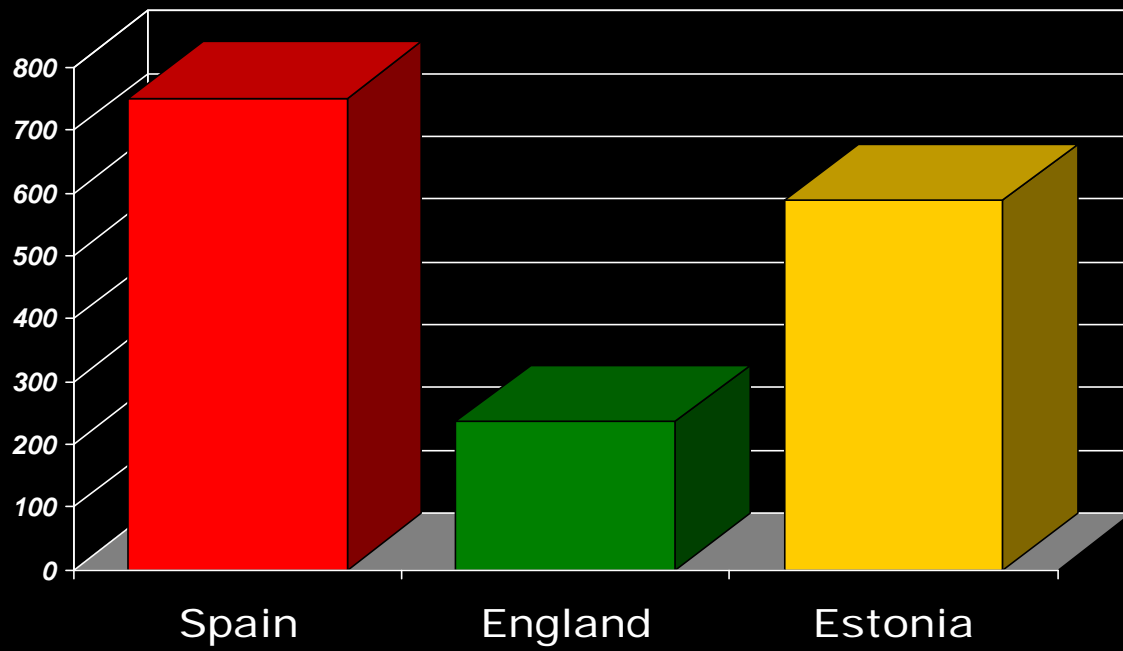

**V**YOUTH'S  
**I**P  
□□□□□□□□□□□□□□

## STUDY POPULATION

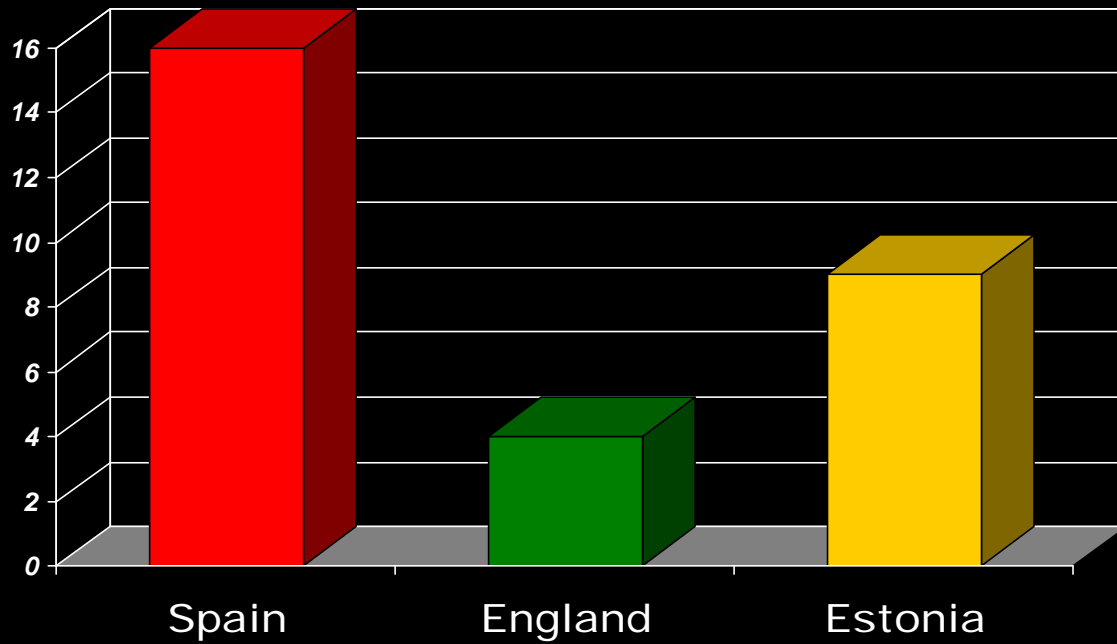

- Total sample population:  
n=1.575
- of **three** european countries:
  - Spain
  - Estonia
  - England
- in **29** teaching centers

## STUDY SAMPLES

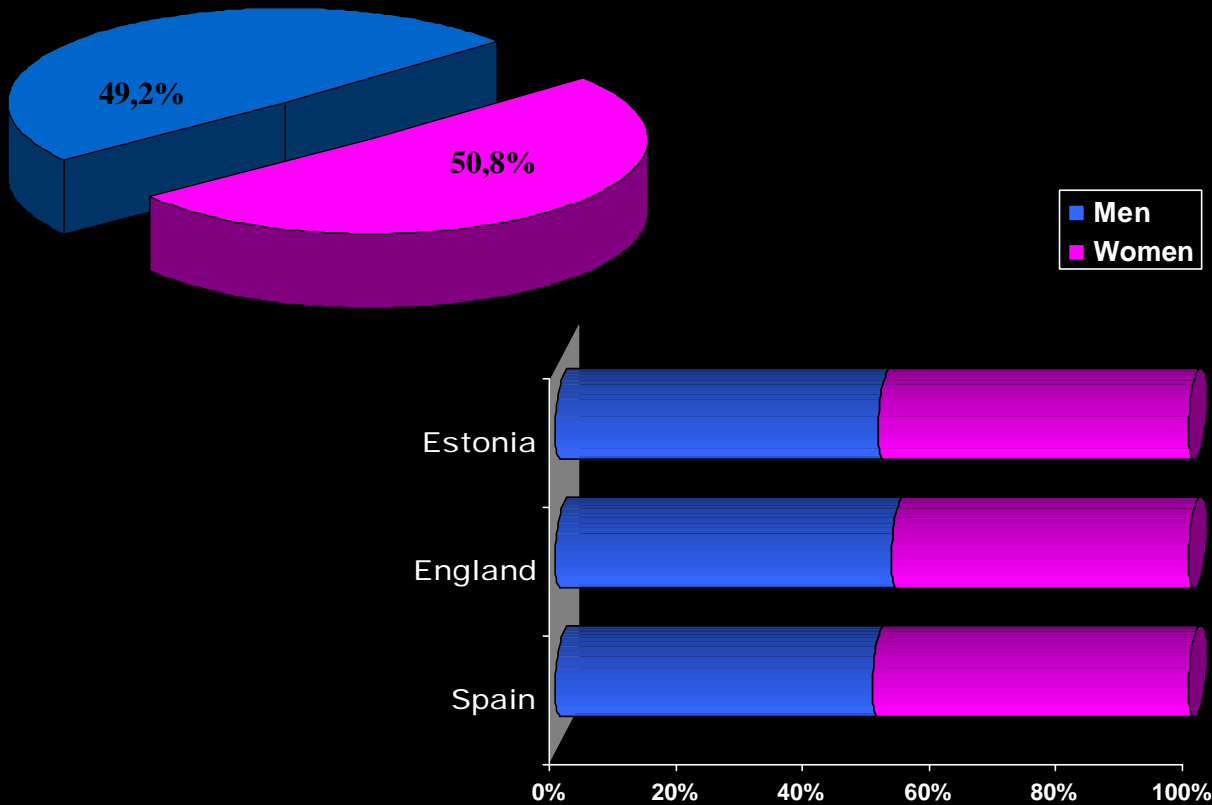

## TEACHING CENTERS PARTICIPATING

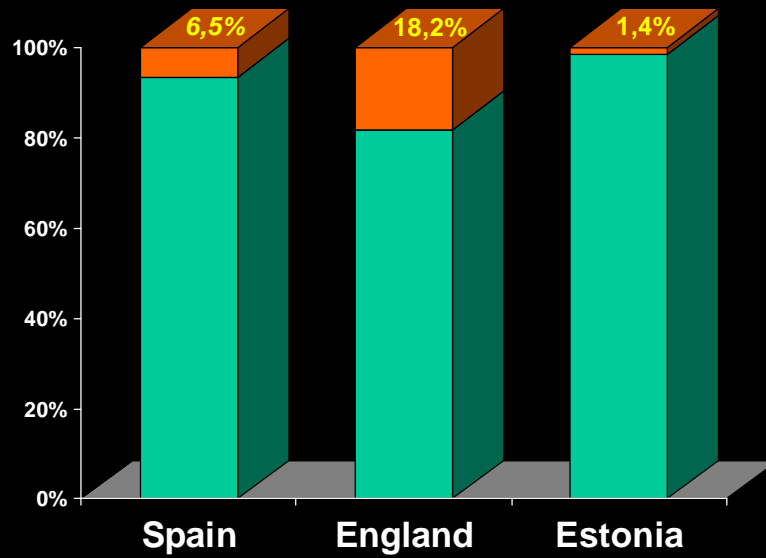

## STUDY POPULATION: AGE DISTRIBUTION

## STUDY POPULATION: SEX DISTRIBUTION

## STUDY POPULATION: CULTURE DISTRIBUTION
